

BEEM063 Module Handbook 2026

Overall Aims

The main aim is to prepare you for your hackathon module assessments (see assessment briefs). At the same time, the course aims to:

1. Consolidate and build on learning from the degree
2. Make use of careers advice from Exeter MSc FinTech graduates
3. Craft a funding deck to raise money for your own FinTech business idea

Pre-Regs

It is helpful if you always come with a Laptop with the same installations we have made during the year. Please make sure you have a Github account, and VS code installed. For Chris' session on Tuesday please also bring some pen & paper. You should also be set up in groups (if you have not arranged yourself into a group, this will be done for you). Ideally groups are 5, but they can be 4 or 6.

Please note: schedule is potentially subject to change, please look out for emails and keep your group informed. Your timetable has 8:30-5:30 every day – this is just so you always have a room to use if you need one to collaborate outside of the following planned sessions.

Training Schedule (all sessions in 0.28 SC, the collaboratory except Friday in Skydeck, Innovation)

Tuesday

9:30-9:45 General Introduction

9:45-12:30 Chris (including Solana Hackathon Group)

Assessment Schedule

Briefing Documents for the following assessments will be shared on ele.

Key Submission Dates

All the following must be submitted as before with beem062, as a pdf document (for the videos, containing the relevant link, for the report, a pdf written report file). Later, submissions will appear (only 1 submission will appear for each group element).

- 1. Group Proposal Video Monday 8th June**
- 2. Main Project Group Video Friday 14th August**
- 3. Individual Report Friday 28th August**

People

Jack Rogers (coordinator)

Jack will coordinate and provide some teaching on Weds.

Chris Carr (core trainer)

Many of you will already know Chris as a lecturer here at Exeter, he taught the smart contract module. His sessions will focus on the networking/cyber security aspects of blockchain systems and post quantum cryptography.

Tony Wood (core trainer)

Again – many of you know him from the Law for FinTech module. Drawing on his experience creating kroo.com, Tony will be taking a series of sessions designed to prepare you for the real workplace, develop yourselves, and create entrepreneurial FinTech ventures. He will also be available as a mentor during the summer.

The following people have also been involved in providing careers and training advice for this module.

David Thibodeau (advisor)

David Thibodeau is a blockchain focused computer scientist currently active in the Nexa ecosystem. His work spans technical education, ecosystem outreach, and blockchain research.

Pearl Nwade (Exeter graduate)

Pearl graduated from the Exeter FinTech programme in 2023 and now works in London at a crypto exchange based in South Africa, mostly on their backend processes. Last year she was named Data and Engineering Innovator of the Year by Crest Africa.
